

PAVITHRA S

Siddaganga Insitute Of Technology, Tumakuru
9353450014 | pavithra.1si22ad032@gmail.com

Educational Background

Bachelor of Engineering – Artificial intelligence and data science

Siddaganga Institute of Technology | 2022-2026
CGPA : 9.25

Class 12

Mahesh PU college
Pre-University, Percentage: 96

High School

Karnataka Public School
High School, Percentage: 92.4

Achievement

- Secured Runner-up position in a tech-domain hackathon conducted by GEC College, Hassan, showcasing innovative problem solving and technical skills.
- Achieved selection among the top 20 teams in the Smart India Hackathon at SIT, standing out from 50 competing teams for innovative solutions.

Projects

TrendPulse – AI-Driven Market Launch Predictor

- Developed an AI-powered platform that helps businesses optimize product launches by analyzing real-time stock market trends and sector-specific data to provide actionable insights.
- Utilizes machine learning models (LSTM) to predict favorable market conditions, sending real-time alerts for strategic decision making on product launches and sales adjustments.
- Tech stack: Python, Flask, TensorFlow (LSTM), Scikit-learn, Pandas, Matplotlib, HTML/CSS.

Financial Risk Analytics System

- Developed the financial risk analytics platform that analyzes financial news and customer feedback using NLP, predicts transaction risks with ML models, and visualizes insights through interactive dashboards for real-time fraud detection and risk monitoring.
- Tech stack: Python, NLTK, spaCy, TextBlob, Scikit-learn, Pandas, MongoDB, Flask, Plotly Dash, Bootstrap.

Twitter Sentiment Analysis

- Developed a Real-Time Twitter Sentiment Analysis Dashboard that collects trending tweets via the Twitter API, streams them using Kafka, performs sentiment classification with TextBlob, and presents categorized insights through a role-based Flask web interface for users and administrators. Features include animated tweet feeds, live sentiment tracking, and simple authentication, with data stored in SQLite.
- Tech Stack: Python, Flask, Tweepy, Kafka, TextBlob, SQLite, HTML/CSS, JavaScript.

Skills

- Languages: Java, Python, SQL
- Data Analysis: Excel, Power BI, Pandas, NumPy, Matplotlib, NLP, NLTK, spaCy, Data Warehousing
- Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems
- Web Development: HTML, CSS

Hobbies

- Volleyball
- Cooking

SmileCore – AI-Based Monitoring for Dental Health

- Developed a web-based AI platform that detects dental health issues from mouth images, providing automated diagnosis and remote consultation options.
- Users upload images, and a CNN-based ML model analyzes them to detect cavities, gum disease, and infections with confidence scores. The platform offers live ai-chat support, video consultations with dentists.
- Tech stack: Python, TensorFlow (CNN), Flask, React.js, MongoDB, java script.

Car Rental Management System

- Implements CRUD operations for seamless data handling across Customers, Cars, Locations, Bookings, and Payments, featuring a command-line interface (CLI) for intuitive navigation, real-time car availability tracking, automated invoicing, and secure multi-payment support.
- Tech Stack: Python, SQL, Streamlit.
